

A Disaster For Everyone?

Or

A Secure Green Future?

It's Time To Decide.

Global warming is here

and it is moving much faster than predicted. The melting of the Greenland ice sheet threatens to produce flooding equivalent to 23 Hurricane Katrinas. The Earth is reaching a tipping point.

High gas prices are telling us that there is no future for an economy addicted to oil.

Time is short. We have only a few years to stop global warming in its tracks, and get ready for a new economy built on clean, renewable energy.

We need to tell our legislators to take decisive action now - before it's too late. That's why we are putting the **Secure Green Future** question on the November ballot.

Please help by signing our petition!

We need 200 signatures of registered voters in each House district to put the question on the ballot.

The Secure Green Future Question

Shall the representative from this district be instructed to vote in favor of legislation that:

- 1) reduces greenhouse gas emissions in Massachusetts by 80% by 2020, and**
- 2) phases out tax incentives for energy-intensive projects, while expanding job creation programs for locally-owned businesses and cooperatives involved in renewable energy, conservation, and sustainable agriculture?**

Paid for by the Committee for a Secure Green Future.
9 Lake Boone Drive, Hudson, MA 01749
